

You are invited to the Virginia Academy of Clinical Psychologists SPRING CONVENTION- IN PERSON- April 1-2

Please join us for VACP's Spring Convention, April 1st and 2nd, 2022, in Staunton, Virginia. The theme of the 2022 conference is the creation of space for assessment throughout the diversified field of psychology. As we know, the psychology field is vast and continuing to grow and become more diverse. The VACP strives to continue to accommodate these changes. This theme invites contributions focused on assessment challenges such as competence, multimethod approaches, resource-seeking, ethics, state regulations, and incorporating assessment technologies. This theme also invites contributors to present research and practice on assessment related to tackling aspects of diversity and culture. The goal is for attendees to gain awareness and competencies of evidence-based practices to inform decision-making and implications for equality and inclusion shaped or influenced by assessment. We are thrilled to have an outstanding program of presenters, including speakers from the board of psychology, presenting on regulation changes, with a particular focus on the standards of practice.

The pandemic continues to be a source of tension for many; as the conference approaches, we will continue to monitor the CDC guidelines and guidance from the Virginia Department of Health and follow recommended prevention strategies, including masking, physical distancing, and hygiene.

Thank you to all of our presenters, VACP staff, and board members for creating a space for continued growth. I hope to see you there.

-Ridjie Chery, Psy.D., LCP, Chair Continuing Education Clinical Psychologist at Alicia's Place

HOTEL ROOM RESERVATIONS

\$129.00* / night

Rates Available March 31-April 2, 2022

All guestroom rates are subject to state and local taxes, currently 12%. Discounted room rates available until March 10, 2022.

Refund Policy: Before March 10, full refunds will be provided upon written request. After March 10, no refunds will be provided for any reason.

<u>Special Dietary Needs:</u> Any member with special dietary needs must contact the VACP office by March 10 so that we may accommodate your request.

<u>ADA Compliance:</u> Any member needed additional assistance in order to take part in the conference is asked to notify the VACP Central Office by March 10 with any necessary accommodations so that VACP may try to make any necessary arrangements.

<u>General Membership Notice:</u> In accordance with the VACP Bylaws, the membership of VACP will gather on Friday, April 1st to conduct business on behalf of the organization. All members in good standing are invited to attend.

Course 1: Board of Psychology Conversation Hour

Members and Staff from the Virginia Board of Psychology will hold a conversation hour focusing on issues of importance for VACP members, including the newly approved updates/changes to the regulations, with particular focus on the Standards of Practice section. Questions from the audience will be encouraged and incorporated into the presentation.

Objectives:

- After the presentation, participants will be able to describe at least three significant issues being discussed/considered by the Virginia Board of Psychology.
- After the presentation, participants will be able to outline the major changes to the Regulations Governing the Practice of Psychology in Virginia.

Presented by:

J.D. Ball, Ph.D., ABPP is a clinical psychologist who currently serves as Vice-Chair of the Board of Psychology and Chair of its Regulatory Committee. As Professor Emeritus of Psychiatry and Behavioral Sciences at Eastern Virginia Medical School, he has extensive prior experience in the delivery of pediatric neuropsychology services, as an instructor and supervisor of clinical psychology graduate students and interns, as an administrator and program director within EVMS, and as an investigator on many clinical research studies, including some 50 peer-reviewed publications. He is currently Editor-in-Chief of Perceptual and Motor Skills, and he is continuing his longstanding service of several decades as a member of the Board of Trustees for Chesapeake Bay Academy, a small K-12 independent school for neuro-divergent students. He was Editor of VACP's Psychogram for several decades, and he

has held several prior terms in various roles on VACP's Executive Council.

Jaime Hoyle is the Executive Director for the Virginia Boards of Counseling, Psychology, and Social Work. Before moving to this role in 2015, she was appointed by Governor Terry McAuliffe as the Chief Deputy Director for the Virginia Department of Health Professions. A native of Alabama, Jaime moved to Boston and graduated from Boston College in 1997, and received her law degree from the University of Richmond, T.C. Williams School of Law in 2000. Always interested in policy and government, Jaime spent the majority of her career working as a staff attorney in the legislative branch of the Virginia General Assembly. She began her career at the Virginia State Crime Commission, where she focused on domestic violence issues and staffed the Sex Offender Task

Force. Seeing the intersection between crime and mental health piqued her interest in behavioral health care. When the opportunity arose, she then took a position as a senior staff attorney to the Virginia Joint Commission on Health Care, where she focused on behavioral healthcare and health workforce issues.

Peter L. Sheras, Ph.D., ABPP is a practicing clinical psychologist and Professor Emeritus in the School of Education and Human Development at the University of Virginia where he served and the Chair of the Department of Human Services and Director of Clinical Training in the Clinical and School Psychology Program. He is the author or co-author of 9 books and numerous articles and chapters on adolescents, parenting stress, violence, bullying, and advocacy. Most recently he taught courses at UVA on the Science of Happiness, Leadership and Adolescent Boys, and Ethics in Psychology. He and his wife publish and practice in the area of relationships and couples. He is a member of the Virginia State

Board of Psychology and is Chair-Elect of the Policy and Planning Board of the American Psychological Association. He is a Past President of the Virginia Psychological Association, APA Divisions 31 and 46, and Past Chair of the APA Board of Educational Affairs (BEA) and the APASI Committee for the Advancement of Professional Practice (CAPP now sunset). He served as the mental health coordinator for his local Red Cross Chapter for 10 years and as a federal advocacy coordinator for his state association. He was cofounder of his local School Crisis Network and Past Chair of the Region Ten Community Services Board.

James L. Werth, Jr., Ph.D., ABPP is a Licensed Clinical Psychologist in Virginia, is Board Certified in Counseling Psychology (American Board of Professional Psychology), and is a Fellow of the American Psychological Association. He has been a member of the Virginia Board of Psychology since late 2014 and currently serves as Chair of the Board. He is CEO of Tri-Area Community Health, a Federally Qualified Health Center (FQHC) serving Southwest Virginia (SWVA). Prior to coming to Tri-Area, he was the Behavioral Health and Wellness Services Director and Black Lung Program Director for Stone Mountain Health Services (another FQHC in SWVA); and prior to that, he was the founding Director of the Radford University Doctor of Psychology Program in Counseling Psychology, which has emphases on rural mental health, cultural diversity, social justice, and evidence-based practice.

Course 2: Evidence-based Assessment and Treatment of Patients with Co-occurring Medical and Psychological Conditions

Clinical Psychologists working in Academic Medical Centers provide evidence-based assessment and intervention for patients with a wide range of co-occurring medical and psychological conditions. These medical conditions include chronic pain, cancer, weight management, and adjustment to chronic illness (e.g., transplant, cardiovascular disease, cystic fibrosis, diabetes). Additionally, during the Covid-19 pandemic clinical psychologists working in the Academic Medical Center setting have been called upon to provide intervention for patients with Covid-19, as well as frontline members working with these patients. Regardless of specialty or practice setting, all clinical psychologist are likely to encounter patients with medical conditions that impact their psychological functioning. The primary goal of this presentation is to review the evidence-based assessments and interventions for 1) chronic pain, 2) psycho-oncology, 3) weight management, 4) adjustment and management of chronic illness, and 5) Covid-19.

Objectives:

- Increase understanding of several high base rate medical conditions and the impact on psychological functioning
- Identify evidence-based psychological assessment and intervention techniques for use with patients with a variety of medical conditions.

Presented by: Joanna Yost, PhD, is a licensed clinical psychologist and Assistant Professor in the Department of Psychiatry and Neurobehavioral Sciences at the University of Virginia School of Medicine. She directed the Behavioral Emergency Response Team (BERT) and co-directs the Behavioral Medicine Consultation-Liaison (CL) service at UVA Health. She also provides brief evidence-based interventions in the UVA Behavioral Medicine Center and the UVA Emily Couric Clinical Cancer Center. She is a member of several professional organizations and serves on the board of directors as the Social Media Chair for the Association of Psychologists in Academic Health Centers (APAHC) and is a member of the Continuing Education Committee for VACP. Her research interests include behavior management in acute care settings and behavioral emergencies.

Heather Bruschwein, PsyD is a licensed clinical psychologist and Assistant Professor in the Department of Psychiatry and Neurobehavioral Sciences at the University of Virginia School of Medicine. She provides psychotherapy in the UVA Behavioral Medicine Center and also works with the UVA cystic fibrosis and organ transplant teams. She is a Member at Large for the VACP Board of Directors and also chairs the VACP Political Action Subcommittee (PAC). Her research interests include mental health and cystic fibrosis, mental health and transplant, and telehealth.

Casey E. Cavanagh, PhD, is a licensed clinical psychologist and Assistant Professor in the Department of Psychiatry and Neurobehavioral Sciences at the University of Virginia School of Medicine. She co-directs the Behavioral Medicine Consultation-Liaison (CL) service at UVA Health, provides brief evidence-based interventions in the UVA Behavioral Medicine Center, and also works with the UVA organ transplant teams. Her research interests include patient-centered care and communication, especially among patients with cardiovascular disease. She is a member of several professional organizations and is the Communications Director for the Cardiovascular Special Interest Group of the Society of Behavioral Medicine.

Virginia Andersen, Ph.D., is a licensed clinical psychologist and an Assistant Professor of Psychiatry and Neurobehavioral Sciences at the University of Virginia School of Medicine. Clinical activities include individual psychotherapy in the Behavioral Medicine Clinic, pre-surgical evaluations for psychological preparedness for bariatric surgery, and individual and group psychotherapy interventions in the UVA Ryan White Clinic. She is a member of VACP, Division 38 of APA, and the Association for Psychologists in Academic Health Centers (APAHC). Research interests include mental health and HIV and mental health and outcomes in bariatric surgery populations.

Lori Urban, PsyD, ABPP is an Assistant Professor at the University of Virginia School of Medicine in the Pain Management Center and is board certified in Clinical Health Psychology. Dr. Urban currently provides clinical services (evaluations and therapy) to individuals throughout the lifespan who experience chronic pain from a variety of sources/conditions. Her special interests include complex pain presentations and the use of self-regulation and mindfulness techniques. Dr. Urban also provides education and observational experiences for physicians in the UVA Pain Management Fellowship program and has presented lectures and continuing education on pain psychology topics for the Virginia Pain Society, APA, and other institutions. She is a member of APA Divisions 38 and 54, VACP, and the

International Association for the Study of Pain (IASP), as well as serving on APA's Division 38 membership committee and UVA's Opioid Task Force. Previous accomplishments include having developed the Pediatric Interdisciplinary Pain Program for children and adolescents for the Peyton Manning Children's Hospital in Indiana and having authored a chapter on alternative treatments for comorbid opioid use disorder in chronic pain.

Course 3: Understanding & Managing Functional Medical Disorders in the Mental Health Office: When is Real - Not Real - But Still Real

This Workshop will educate attendees concerning the conditions such as Functional Neurologic Disorder (FND, Functional Speech Disorder (FSD) and Functional Visual Disorder (FVD) in the context of traditional mental health diagnoses of Conversion and Somatization disorders, as well as Malingering. For many patients, their condition is one of marked disability. While there is a minority who are malingering, the larger portion of this group find that their lives are severely disrupted. They may lack the mental health resources to manage life's problems. These conditions account for $\sim 1/3$ of outpt. neurology visits.

Objectives:

- Acquire an understanding of how tradition diagnoses such as Conversion DO and Somatization DO are considered by medical specialists (e.g. FND).
- Acquire an understanding of how subjective symptoms differ from objective symptom data and how each may have a role in differential diagnosis.
- Acquire an understanding of the need for boundary setting in the management of Functional Disorders, and what therapeutic management approaches to consider.

Presented by: Edward A. "Ted" Peck III received his MS & PhD degrees from Tufts University and is Board Certified in Clinical Neuropsychology ABPP-Cn). He was twice named to the Virginia Board of Psychology. Currently, he is the chair of Professional Rules & Ethics Committee for the Virginia Academy of Clinical Psychology. His full-time private practice (Neuropsychological Services of Virginia) is in Richmond, Virginia.

Dr. Stephanie Bajo is a board certified neuropsychologist and an Assistant Professor at the University of Virginia Department of Psychiatry and Neurobehavioral Sciences. Dr. Bajo's outpatient clinic offers cognitive testing for individuals with a wide range of neurological, medical, and co-morbid psychiatric conditions, with primary clinical interests in the areas of concussion/TBI, epilepsy, and infectious disease. She also provides psychodiagnostic evaluations through an inpatient consult service line for patients newly diagnosed with non-epileptic seizures (NES) while admitted to the UVA Epilepsy Monitoring Unit (EMU). Through this inpatient work, Dr. Bajo developed greater interest in the diagnosis, assessment, and treatment planning for individuals with Functional Neurological Disorders

and she hopes to expand her work in this area.

LODGING INFORMATION: HOTEL 24 SOUTH

Discounted room rates available until March 10, 2022.

Call 540-885-4848 and mention VACP to make your reservations, or visit www.vapsych.org/hotel to make your reservations online.

*All guestroom rates are subject to state and local taxes, currently 12%.

Course 4: Ethical Considerations for Assessing Medical Decision-Making Capacity: Recommendations for Inclusive Practices

This presentation will focus on the ethical importance of accurately assessing medical decision-making capacity when working with individuals with disabilities and chronic health conditions. Presenters will also discuss recommendations for appropriate accommodations both for the assessment process and for maximizing individuals' ability to participate in their medical decisions. The presentation will include an overview of evidence-based criteria for assessing capacity and highlight collaborative practices to promote

Qualifies for Ethics Credit

independence and choice. Specific recommendations will be offered for working with individuals with communication and cognitive challenges as well as ways in which rehabilitation psychologists can partner with other disciplines and providers to include patients and honor their values and preferences. Evidence-based guidance will be reviewed and specific recommendations offered to provide attendees with tools to implement in their practices.

Objectives:

- List the primary criteria to consider when assessing decisional capacity
- · Identify accommodations for maximizing individuals' ability to participate in their medical decisions

Presented by: Suzzette M. Chopin is a Board Certified Rehabilitation Psychologist. She specializes in acquired and traumatic brain injury at the Central Virginia VA Health Care System in Richmond, where she serves as training director for the APA-accredited postdoctoral fellowship in rehabilitation psychology. Dr. Chopin is also the Treasurer of the American Board of Rehabilitation Psychology. She completed her PhD at Virginia Commonwealth University and an MBA at the University of New Orleans.

Thomas Campbell is a Board Certified Rehabilitation Psychologist. He graduated from VCU with a PhD in Clinical Psychology in 2008. He currently works as the Psychology Training Director and Rehabilitation Psychology Program Manager at the Central Virginia VA Health Care System in Richmond, Virginia. His clinical and research focus areas include various aspects of traumatic brain injury.

Course 5: Effective Discipline Develops Enjoyable Child Behavior

Parent and teacher's disciplined use of behavioral techniques can result in comfortable living environments. Increasing the reinforcement value of caretakers and identifying what is maintaining undesirable behaviors are prerequisites before using Time Out and other behavioral techniques for decreasing "what you don't want."

Objectives:

- What are some ways of increasing the reinforcement value of caretakers?
- What are some ways of increasing the effectiveness of Time Out?

Presented by: Dr. Ed Tiller earned his Ph.D. from the University of Tennessee. He has worked in a wide variety of settings including as faculty in the Psychology Department at the University of Richmond, Director of the Children and Youth Division at Eastern State Hospital, Director of Psychological Services at Peninsula Psychiatric Hospital, Senior Clinical Services Consultant at HCA Psychiatric Company and is the founder and director of Williamsburg Centre For Therapy. He has provided training in Cognitive-Behavioral techniques to

parents in clinical and home settings and to clinicians in Virginias' Child Development Centers. While at the University of Richmond he developed and taught Managing Student Classroom Behavior and Individualizing Instruction to teachers and principals. He has enhanced student classroom behavior through training teachers to effectively use behavioral techniques in various academic settings, from Richmond to Tidewater VA, from preschool to senior high school, private and public schools, special ed to regular ed and the Juvenile Justice System. He is the current President of the Virginia Academy of Clinical Psychologists.

Course 6: Multimethod Personality Assessment and "Ordinary" Clinical Work

Competence in psychological testing is arguably what most clearly distinguishes clinical psychologists from other mental healthcare providers. Nevertheless, clinical psychologists are using psychological testing less now than they ever have, particularly in their work with "ordinary" psychotherapy patients. I will present research findings and case examples to demonstrate the utility of routine psychological assessment. I will also present a detailed case study of a young adult male who completed a psychological test battery (including WAIS, projective drawings, Rorschach, TAT, MMPI, etc.) and a follow-up test battery 15 years later. The case will illustrate important clinical concepts, including the value of multimethod assessment, subintentioned suicide, and the stability of personality.

Objectives:

- Appreciate the utility of psychological assessment in routine practice.
- Understand the importance of multimethod psychological assessment.

Presented by: Glenn Sullivan, Ph.D., is a clinical psychologist in private practice in Lexington, Virginia. His clinical specializations include psychological assessment, forensic evaluation, and individual psychotherapy. Dr. Sullivan is a professor of psychology at the Virginia Military Institute, where he has taught since 2006. He is the recipient of VMI's Distinguished Faculty Award and the Thomas Jefferson Teaching Award. Dr. Sullivan earned his Ph.D. in clinical psychology at the Pacific Graduate School of Psychology, Palo Alto, California. He completed his predoctoral internship at the San Francisco Veterans Affairs Medical Center, and a postdoctoral residency in post-deployment mental health at the Veterans Affairs Medical Center in Salem, Virginia. Dr. Sullivan is the co-author of The Suicidal

Patient: Clinical and Legal Standards of Care (3rd ed.), published by the American Psychological Association, and co-editor of the Handbook of Military and Veteran Suicide, published by Oxford University Press.

Course 7: Forensic Psychology in Virginia: A Primer

Forensic psychology is a burgeoning area of psychological practice in Virginia. Clinicians may find themselves interested in exploring how they may contribute to, or benefit from, forensic psychology as an area of work. Knowing how to become a part of this system is not only best practices, but it is also required by Virginia law (in certain circumstances). Clinicians are also increasingly faced with situations and patients who are part of the forensic system, requiring additional knowledge and resource-seeking in order to provide services in line with best-practices. This presentation is designed to assist clinicians with understanding not only the differences between clinical and forensic psychology, but also providing guidance and education about the forensic system in Virginia, and how clinicians can become involved and seek out guidance as needed when faced with situations with a clearly forensic bent.

Objectives:

- Describe the differences between clinical and forensic psychology.
- Describe the forensic system in Virginia, and be able to access resources for guidance and training to support their interest in this area of specialization.

Presented by: Tallie Armstrong, Ph.D. received her clinical psychology doctoral degree from Sam Houston State University, and completed her internship at the Eastern Virginia Medical School/Eastern State Hospital. She then completed a postdoctoral fellowship in forensic psychology at the Medical University of South Carolina, and worked as a forensic psychologist and research coordinator for Bridgewater State Hospital in Massachusetts. Generally, her clinical work has focused on treatment and assessment of forensically-admitted individuals recovering from serious mental illnesses, sexual offenders, violence risk assessment, and civil and criminal forensic assessments of adults and juveniles. Research efforts and publications include understanding reasons for readmission, mitigating institutional violence, and examining trends in forensic evaluation reports and hospital admissions over time. She has presented seminars in the broad area of violence risk, juvenile forensics and juvenile forensic civil evaluations.

Dana L. Formon works as a member of the Forensic Evaluation Team at Central State Hospital in Petersburg, where she completes criminal forensic evaluations of competency to stand trial and insanity. She has previously worked for the Colorado Department of Human Services, where she also conducted diminished capacity/partial defense evaluations. Her primary interests within research and service include the supervision of forensic trainees, best practices in report writing, competency restoration treatment, and offender rehabilitation.

Helen Greenbacker, Psy.D. obtained her graduate degree from Florida Institute of Technology, completed an APA-accredited internship with Southeast Human Service Center in Fargo, North Dakota, where she gained experience in pre-trial sex offender evaluations, and parental capacity evaluations. She then moved to Kansas City, Missouri, where she completed her post-doctoral residency as a member of the forensic evaluation team at Center for Behavioral Medicine, completing evaluations regarding competency, responsibility, and sexually violent predator determination. Following her residency year, she returned to her home state of Virginia to work at Central State Hospital as a treatment team psychologist, the Director of Psychology, and currently as the Forensic Evaluation Team Supervisor. She has been appointed by the Commissioner to the Forensic Evaluation Oversight Review Panel, providing review and quality assurance of competency to stand trial and sanity at the time of the alleged offense evaluations completed by evaluators on the state-wide approved evaluator list.

Skylee Campbell is a Postdoctoral Forensic Fellow at Central State Hospital, a maximum-security inpatient psychiatric hospital in Petersburg, Virginia. Her postdoctoral experiences primarily include conducting competency to stand trial and sanity at the time of the offense evaluations. She completed her Psy.D. in Clinical Psychology with a Forensic Concentration from The Chicago School of Professional Psychology, Washington D.C. campus in August 2021. Previous employment and training experiences include administering assessments and providing individual and group therapy services in a variety of settings (i.e., neuropsychology private practice, inpatient psychiatric hospitals, and residential substance abuse). Skylee's research interests focus primarily on

forensic and police psychology. For example, her dissertation research examined the effects of secondary trauma on executive functioning in law enforcement officers. Current ongoing research projects also include examining common themes and risk factors as they relate to readmissions and barriers to discharge within an inpatient psychiatric hospital setting.

Professional Liability Insurance Peace of Mind Protection for Your Career

We've got you covered

Trust Sponsored Professional Liability Insurance* for psychologists is spot on — with essential coverages that protect you whenever and wherever you provide psychology services, plus a host of features you may not find in other malpractice policies.

We focus on Psychologists

At The Trust, you're not just another insurance policy among so many professional classes. Our malpractice coverage and supporting programs are designed by psychologists and insurance experts to focus on the profession of psychology — especially as it explores and adapts to new and dynamic service delivery models.

Insurance provided by ACE American Insurance Company, Philadelphia, PA and its U.S.-based Chubb underwrilling company affiliates. Program administered by Trust flack Management Services, Inc. The product information above is a summary only. The insurance policy actually issued contains the terms and conditions of the contract. All products may not be available in all states. Chubb is the marketing name used to refer to subsidiaries of Chubb Limited providing insurance and related services. For a list of these subsidiaries, please visit new.hubb.com. Chubb Limited, the partn company of Chubb, is listed on the New York Stock Exchange (NYSE: CB) and is a component of the S&P 500 index.
